

The ISN is a free public service that provides a wide range of high-quality and comprehensive products and resources to encourage the exchange of information among international relations and security professionals worldwide. The ISN works to promote a better understanding of the strategic challenges we face in today's changed security environment.

Based in Zurich, Switzerland, at the [Center for Security Studies \(CSS\)](#) at [ETH Zurich \(Swiss Federal Institute of Technology Zurich\)](#), the ISN's dedicated team – drawn from various disciplines, including the humanities, the social sciences, and information and communication technology – engage in research projects and education activities, provide news stories and in-depth analyses, and develop technologies for information sharing and for creating and supporting e-learning.

The ISN has close relationships with leading international partner institutes – research institutes, think tanks, and government and non-governmental organizations. The ISN supports its ever-increasing partner network by organizing conferences and seminars, bringing together experts and policy-makers, and fostering the electronic exchange of information.

The ISN is jointly funded by the [Swiss Federal Department of Defence, Civil Protection and Sport \(DDPS\)](#) and ETH Zurich.

The Precautionary Principle and WTO Law: Divergent Views Toward the Role of Science in Assessing and Managing Risk

Author(s): Lawrence A Kogan

Publisher(s): John C. Whitehead School, Seton Hall University, South Orange, US

Publication: [Women and Children](#)

Date of publication: 2004

From Page 77 **to** 124

Description: This document presents the divergent political views of the EU and US toward the usefulness of science as a tool to understand and manage uncertainties surrounding public health and environmental risks. The author chronicles concerns that have arisen regarding food safety, chemicals management, waste disposal, industrial pollutants and climate change. He concludes that the resolution of these issues is likely to have a profound legal, social and economic impact on all WTO member governments and industries.
