The Great Brazilian IP-Train Robbery

This article published by the Institute for Trade, Standards and Sustainable Development (ITSSD) focuses on Brazil's pursuit of Global IP Law Reforms that will weaken US Private Property Rights. From the introduction: "Princeton, NJ – March 19, 2007 – In a new University of Miami Inter-American Law Review article entitled, Brazil's IP Opportunism Threatens US Private Property Rights, trade and regulatory expert Lawrence Kogan tracks how Brazil is navigating internationally to 'railroad' the great American engine of intellectual property-based innovation and economic growth."
