U.S. Property Rights Are Under International Assault

The ITSSD Identifies How U.S. Internationalists Are Assisting Activist Groups and Foreign Governments to Weaken U.S. Private Property Rights Via Regulation and Compulsory Licensing

PRINCETON, N.J., Oct. 31 /PRNewswire/ -- In a speech recently delivered at the Tenth Annual National Conference on Property Rights of the Property Rights Foundation of America, and in an accompanying article, international trade and regulatory law expert Lawrence Kogan of the ITSSD discusses how misguided American internationalists are actually helping foreign governments and environmental and health extremists to weaken the U.S. Constitution and the exclusive private property rights guaranteed by the U.S. Constitution's Bill of Rights.

These politicians are promoting the adoption of strict regulatory laws and flexible compulsory licensing mechanisms used in other countries within Europe and Latin America that are "known for their socialist solutions to 'deemed' market failures, populist wealth re-distribution policies, significantly higher regulatory burdens, ideological aversion to scientific and economic protocols and the deployment of novel technologies, and slower economic growth rates."
